

FT722-PM (PIPE MOUNT)

ACOUSTIC RESONANCE WIND SENSOR

DESIGNED FOR TURBINE CONTROL

The FT722 Pipe Mount wind sensor is designed for installation on top of a pipe or post with an FT090 pipe mount adapter. The sensor cable is run inside the pipe giving added lightning and environmental protection. Factory alignment of the pipe mount adapter ensures that the sensor is automatically aligned with the central axis of the turbine without error.

Ideal for retrofit, it provides a single, compact solution to replacing an existing mechanical wind vane and anemometer wind measurement system. With no moving parts to wear out or degrade, turbine downtime is reduced, power output is increased and yaw control is more efficient. With updated software and improved accuracy, it is also a fit and function replacement for the FT702LT-PM sensor.

The sensor has additional heating capacity designed to heat the metal adapter and pipe. This prevents ice from building up on the adapter and blocking air flow through the measurement cavity. It has passed over 30 environmental tests to demonstrate its durability.

DIMENSIONS

A. Sensor height to connector base.....	161mm
B. Sensor width max.....	56mm
C. Adapter to pipe mating surface to cavity centre.....	171mm
D. Alignment feature width.....	5.1mm
E. Sensor mounting flange width.....	45mm
F. Adapter external diameter.....	74mm

SPECIFICATIONS AT A GLANCE

WIND SPEED

0-50 m/s

WEIGHT

350 g

AVAILABILITY

> 99.9 %

FT722-PM (PIPE MOUNT)

WIND SPEED

Range.....	0-50m/s
Resolution.....	0.1m/s
Accuracy.....	±0.3m/s (0-16m/s) ±2% (16-40m/s) ±4% (40-50m/s)

WIND DIRECTION

Range.....	0 to 360°
Resolution.....	1°
Accuracy (within ±10° datum).....	2° RMS
Accuracy (outside ±10° datum).....	4° RMS

SENSOR PERFORMANCE

Measurement principle.....	Acoustic Resonance (automatically compensates for variations in temperature, pressure & humidity)
Units of measure.....	Metres per second, kilometres per hour or knots
Altitude.....	0-4000m operating range
Temperature range.....	-40° to +85°C (operating and storage)
Humidity.....	0-100%
Ingress protection.....	IP66, IP67 and IPX6K
Heater settings.....	0° to 55°C. The heater set point can be configured

POWER REQUIREMENTS

Supply voltage.....	12V to 30V DC (24V DC nominal)
Supply current (heater off).....	31mA typical
Supply current (heater on).....	Limited to 4A (default), 6A (max) – configurable in software in 0.1A increments. Heater power consumption will depend on the energy required to keep the sensor's temperature at the user determined set point. The heater and sensor power consumption is limited by default to 99W.

PHYSICAL

I/O connector.....	5-way (RS485 option), 8-way (4-20mA option) multipole connector
Weight.....	Sensor 350g Adapter 350g

DIGITAL SENSOR

Interface.....	RS485 (half-duplex), galvanically isolated from power supply lines and case
Format.....	ASCII data, polled or continuous output modes, Polar and NMEA 0183
Data update rate.....	Maximum 10 measurements per second
Error handling.....	When the sensor detects an invalid reading a character is set in the wind velocity output message. This error flag character is 1

ANALOGUE SENSOR

Interface.....	4-20mA, galvanically isolated from power supply lines and case.
Format.....	One 4-20mA current loop for wind speed (different scaling factors are available). One 4-20mA current loop for wind direction (datum value configurable as 4mA or 12mA). Both analogue channels are updated ten times per second.
4-20mA configuration port.....	This port is for the user to change the internal settings of analogue sensors and to perform diagnostic testing. This interface is not intended for permanent connection to a data logger or other device.
Error handling.....	When the sensor detects an invalid reading then both speed and direction current loops will drop to a default value of 1.4mA (configurable up to 3.9mA).

EMC AND ENVIRONMENTAL TESTS

The FT7 Series have passed over 30 different environmental test certificates including Corrosion, Icing, De-Icing, Shock, Hail, Drop, ESD, power interruption and EMC. Further test details and full test reports available on request or via our website.
